

Better Feed . . . Better Fish

SQ Transfer

Freshwater to Seawater Transfer

The next generation of high performance salmon diets is available in the **COREY** line of diets. The focus of this line of feeds is fish health, growth and quality. The new **SQ Transfer** has replaced and improved all previous freshwater/saltwater transfer feeds. Results with **SQ Transfer** will include improved osmo-regulation, better saltwater feeding, increased survival and better growth.

The **SQ** line of diets is certified Safe Quality Food (SQF) 2000 level 3. This means that both the safety and quality systems used to make these feeds are HACCP based and third party audited. This program is owned by the Food Marketing Institute (FMI) and is fully endorsed by major retailers throughout the world.

SQ Transfer should be used for four weeks in freshwater and at least four weeks in saltwater.

PRODUCT CHARACTERISTICS	
Feed Sizes	2.5mm pellets
Crude Protein (minimum)	48%
Crude Fat (minimum)	24%
Crude Fiber (maximum)	1.2%
Moisture (maximum)	8%
Ash (maximum)	8%
Phosphorus (maximum)	1.2%
NFE (actual)	12.4%
Gross Energy	24.5
Digestible Energy (MJ/Kg)	19.2
Added Pigment (Canthaxanthin/ Astaxanthin)	30C/30A PPM
